Southwest Florida Water Resources Conference A History of Evolving Issues & Priorities

Committee Members

by John Capece and Nargiza Abduvohidova

1991 to 2019

For the past 28 years a group of professional associations and educational institutions have joined together to host an annual meeting discussing regional water resources issues. Conference topics have included water supply, water quality, harmful algal blooms, surface water, ground water, the Caloosahatchee Basin, Estero Bay, climate change, economics, hurricanes, floods, & drought. Revenues support university student scholarships and the conference itself promotes student-professional interactions.
